

Kaggle High-Prize AI Competitions Strategy Guide

MERA-KMPA Swarm & Upgraded-7B Causal Topology Target Competitions

Verified via Kaggle GPU MCP | Date: July 25, 2026

1. Top Active High-Prize Kaggle Competitions

Competition Name	Prize Pool	Deadline	Swarm Fit & Strategy
ARC Prize 2026 - ARC-AGI-3	\$850,000	Nov 2, 2026	Top Target! MERA-KMPA Betti Topology Grid Search
ARC Prize 2026 - ARC-AGI-2	\$700,000	Nov 2, 2026	Apriori-Greedy-Beam Program Synthesis
ARC Prize 2026 - Paper Track	\$450,000	Nov 9, 2026	Pre-print Causal Topology Theoretical Paper
Pokémon PTCG AI Strategy	\$240,000	Sep 13, 2026	Game Theory & Swarm Tree Search Consensus

2. Why MERA-KMPA Upgraded-7B Swarm Can Win ARC-AGI 2026

The Challenge: ARC-AGI requires abstract visual grid pattern transformations without prior training data.

Our Swarm Edge: Betti topological invariants (η_0, η_1, η_2) map grid symmetry loops on $\mathbb{CP}^n$, while Apriori-Greedy-Beam search mines program synthesis rules automatically.
