

Google AdSense Approval & Policy Violation Fix Guide

Step-by-Step Protocol to Resolve Ads.txt, Publisher Content & Low Value Violations

Sovereign Entanglement Asset Systems (SEAS) | Verified: July 26, 2026

1. Root Causes & Actionable Solutions Matrix

AdSense Issue / Violation	Root Cause	Automated Remediation Protocol	Status
Ads.txt status: Not found	Missing root ads.txt file on server	Deploy root `ads.txt` containing `google.com, pub-2789744628056088, DIRECT, f08c47fec0942fa0`	FIXED
Screens without publisher-content	Pure web app / SPA lacking static HTML text	Inject structured HTML blog/articles hub (1,000+ words per article) and policy footers	IN PROGRESS
Low value content	Crawler sees thin text or duplicate code	Publish 10+ original, high-word-count industry guides on domain `/blog/` route	IN PROGRESS
Auto Ad Script Missing	Script tag omitted from HTML head	Inject auto-ads script tag into <head> of all templates	FIXED

2. Next Steps for Instant Approval & Review Request

Step 1: Push updated code with ads.txt and AdSense script tag to Cloudflare Pages / Vercel.

Step 2: Verify that `https://<domain>/ads.txt` returns `google.com, pub-2789744628056088, DIRECT, f08c47fec0942fa0` in your web browser.

Step 3: Click 'I confirm I have fixed the issues' and hit **Request review** in the Google AdSense dashboard!
