2. Stripe Managed Payments Activation & Alert Resolution

Why Managed Payments Alerts Appear: Stripe requires explicit identity verification (business details, tax EIN/SSN, and payout bank account) under Settings -> Business Settings -> Managed Payments.

How to Clear Managed Payments Warning in 3 Steps:

1. Log into your live **Stripe Dashboard** (dashboard.stripe.com).
2. Go to **Settings** → **Business Details & Payments** → **Account Details**.
3. Provide your Business Legal Name, Tax Identification Number (TIN/EIN), and Bank Payout Account. Once submitted, Stripe will instantly enable Managed Payments and clear all account warning banners across all checkout endpoints!
