

Auth0 Callback Mismatch Fix & Rich Landing Page Restoration Report

Standardized redirect_uri, Rich Marketing Landing Pages & Clean Logout Architecture

Sovereign Entanglement Asset Systems (SEAS) | Verified: July 26, 2026

1. Resolved Callback Mismatch & Site Architecture Upgrades

Identified User Issue	Technical Root Cause	Engineering Fix Deployed Across 7 Ventures
`Callback URL mismatch` on Auth0	Passed `redirect_uri=https://domain/` instead of `/login.html`	Explicit `redirect_uri` Fix: Bound `redirect_uri` to `/login.html` across all 7 products.
Sparse Landing Pages	Overwritten marketing hero/features grid	Restored Full Rich Marketing Pages: Hero, Demo Consoles, Features Grid, Pricing with Stripe & FAQs.
Sign Out Error Page	Auth0 returnTo mismatch	Clean Session Clearance: Logout clears `localStorage` and reloads cleanly.

2. All 7 Ventures Restored & Pushed to Production

Full Alignment Accomplished: Rich marketing landing pages have been fully restored for all 7 ventures (aetherquant.cloud, shieldaudit.digital, leadnexus.business, copyflow.cloud, eminencecore.com, devpulse.live, nichestack.online) with top navbar Sign In buttons seamlessly routing to `/login.html`!
