Question 13	Capabilities Provided	Check: Account Creation, Account Management, Campaign Creation, Campaign Management, Reporting, Keyword Planning Services

2. Revised Q7 Description (< 1,000 Characters)

Eminence Core Solutions builds proprietary web platforms (eminencecore.com, aetherquant.cloud, shieldaudit.digital, leadnexus.business). We created an internal Python tool using the google-ads SDK to manage Search & Display campaigns exclusively for our own sites.

Tool Functions:

- 1. Automated Campaign Creation: Programmatically creates search campaigns, ad groups, text ads, & keywords.*
- 2. Performance Telemetry: Pulls daily impressions, clicks, CTR, and conversions via GoogleAdsService.SearchStream.*
- 3. Automated Bidding & Budget Pacing: Adjusts keyword bids and daily budget caps based on ROAS rules.*

Audience: Strictly internal employees. Not offered to third parties or clients.
