Final Round Resolution	20 Trading Days	August 27, 2026	Final 20-day target settlement

2. How Numerai Ranks Models & How We Know We Are Improving

Primary Metric (MMC): Meta Model Contribution measures the unique orthogonal signal your model adds to Numerai's fund ensemble.

Local Validation Benchmark: Running `python src/backtest\_model.py` evaluates models across 100+ historical validation eras. Higher validation Sharpe (>0.90) guarantees higher live performance.
